

MAVRIK

**STEADI
DRONE**
WWW.STEADIDRONE.COM

'The build quality of the MAVRIK is the "best ever seen" I'm simply amazed!
The MAVRIK will replace my Freefly Cinestar Hexa completely. Pure quality components, fits perfectly'

Carsten Poulsen - www.zoomfoto.dk

The **STEADIDRONE MAVRIK** brings with it a new era of easy to use affordable drones you can fly with confidence. Whether it be work or play, the MAVRIK offers unique design features that make it a pleasure to operate everyday. Fully autonomous and intelligent, the MAVRIK allows for simple and effective capturing of aerial media, from the smoothest video filming to mapping and data acquisition, agriculture, search and rescue, waypoint mission planning and even 'follow me' features, the MAVRIK does it all and more, no longer do you need a different drone for every job, with the ability to now fly a huge variety of cameras and payloads with a single drone, get the job done quickly, reliably and save both time and money.

What sets the MAVRIK apart from everything else available is our effective design, with features developed by aerial professionals, for aerial professionals, who need a practical, reliable drone they can easily travel with and fly everyday, able to focus on capturing the media needed rather than building and fussing with technical issues.

EASY, RELIABLE GPS

Intelligent, accurate, fully autonomous missions with waypoints, spline navigation, 'follow me', return home and much more

OPEN CAMERA SYSTEM

An advanced, fully adjustable camera gimbal system with support for a huge range of different camera types, sizes and applications.

RAPID DEPLOY AIRFRAME

A quick and easy, toolless airframe design that allows for practical everyday transport and travel. Robust, reliable, compact.
